

New Prices for Educational Institutions

Encouraging the use of JMAG for the purposes of research and education

With the progress of technological innovation, the expectations of universities as innovators continues to rise. In forming original ideas, such as entirely new proposals for operating principles, it is necessary to have a sufficient grasp on the physical phenomena that occurs inside equipment.

Through simulations with a foundation in the most fundamental of principles, JMAG fosters an understanding of the kind of operations that occur repeatedly both inside equipment and air regions, such as electromagnetic fields, temperatures, and stress, which would otherwise not be visible by any other means. Intuitive ideas can be confirmed the moment they spring to mind, and can be further developed with ease.

JMAG has an impressive track record not only in the field of industry, but also in university settings that are raising the next generation of engineers. This is achieved by a contribution to the development of engineer education programs by offering favorable environments and simulation technologies

JMAG Educational Package Plan

	Plan 1	Plan 3
Options for number of licenses	1 License With parallel solver for 8 parallel processes	3 Licenses With parallel solver for 48 parallel processes 1 set of 3 licenses is PSL (can run 100 cases simultaneously)

Technical Support Options

1 Support tickets	5 Support tickets	15 Support tickets
-------------------	-------------------	--------------------

* The Software Maintenance Service

The JMAG Educational Package Plan includes software maintenance service for the 1st year.

The software maintenance service includes version upgrade (valid for one year) and access to the JMAG support site.

The software maintenance service is needed a continuous contract. **This service does not include technical support.**

* The Technical Support Option

For the technical support option, users can make enquiries. This is intended for customers with the software maintenance service. Expiration periods for the technical support options are the same as those for the software maintenance service. Those past their expiration period cannot be used.
